

Bosch HMD200 Daredevil™ Hole Saw Delivers Up to 10x Speed for Drilling in Multi-Materials

Bosch HMD200 Daredevil™ Hole Saw Delivers Up to 10x Speed for Drilling in Multi-Materials

Bosch premium carbide teeth, thin-kerf design and deeper cup provide fast, high-quality holes on the jobsite

Las Vegas, Nev., Feb. 3, 2015 – The Bosch HMD200 Daredevil™ Hole Saw offers greater speed and lasts longer while delivering excellent hole quality and extra deep cuts. Thanks to optimized Bosch premium carbide teeth, a deeper cup (2-3/8") and an extra-large gullet design, this hole saw cuts through multiple materials: wood, thin aluminum, fiberboard, PVC, tile, concrete block and stacked materials. That means the Daredevil is really seven hole saws in one.

The Daredevil hole saw is up to 10x faster¹ and carbide helps it last longer than a standard bi-metal hole saw in wood, drywall and concrete block applications. Cup depth is 50 percent greater than standard hole saws. Plumbers, general contractors, residential builders, remodelers and electricians will find the Daredevil hole saw the right accessory for drilling holes in stacked materials to run pipes and conduit, mainly in residential and light commercial construction applications. The deeper cup offers the user greater versatility and makes the job easier, start to finish

"The Bosch Daredevil Hole Saw gets the job done faster, lasts longer and drills in more materials than other hole saws," said Jared Schmidt, product manager, hole saws and oscillating tool blades, BOSCH POWER TOOLS. "Our customers wanted a hole saw that is faster and lasts longer, especially in wood. That's what we delivered with this premium Daredevil product, which also solves the common problem of drilling in multiple materials."

The combination of Bosch premium carbide teeth, extra-large gullets and a deep cup design allows the hole saw to cut through materials faster, including typical applications in wood and drywall. Standard bi-metal hole saws tend to work slower in wood and have limited life.

¹ Bosch testing, Daredevil hole saw vs bimetal hole saw in 3/4" plywood

The Bosch Daredevil Hole Saw delivers better drilling accuracy and better hole quality, plus easy plug removal. A universal multi-purpose arbor makes for fewer pilot bit changes and a quicker job because it now fits all popular brands and cup sizes. And 1/4" hex pilot bits are optimized for material drilled e.g., high-speed steel bit for wood and metal; abrasive tip bit for multi-materials.

To be considered a Bosch Daredevil product, a power tool accessory must be best-in-class for speed, life or ease of use. The Bosch Daredevil Hole Saw offers best speed. Hole saw applications include holes for pipes between floors in both residential and commercial projects.

About Bosch

The Bosch Group is a leading global supplier of technology and services, active in the fields of automotive technology, energy and building technology, industrial technology, and consumer goods. According to preliminary figures, more than 281,000 associates generated sales of 46.4 billion euro (\$61.6 billion) in 2013. The Bosch Group comprises Robert Bosch GmbH and its more than 350 subsidiaries and regional companies in some 60 countries. If its sales and service partners are included, then Bosch is represented in roughly 150 countries.*

Its operations are divided into four business sectors: Automotive Technology, Industrial Technology, Consumer Goods, and Energy and Building Technology. This worldwide development, manufacturing, and sales network is the foundation for further growth. In 2013, Bosch applied for some 5,000 patents worldwide. The Bosch Group's products and services are designed to fascinate, and to improve the quality of life by providing solutions which are both innovative and beneficial. In this way, the company offers technology worldwide that is "Invented for life." Additional information on the global organization is available online at www.bosch.com, www.bosch-press.com, and <http://twitter.com/BoschPresse>.

**Due to a change in legal rules governing consolidation, 2013 figures can only be compared to a limited extent with 2012 figures. Exchange rate: 1 EUR = \$1.32812 (or 16.96406 MXN or \$1.36837 CAD).*

Bosch in North America

In the U.S., Canada and Mexico, the Bosch Group manufactures and markets automotive original equipment and aftermarket products, industrial drives and control technology, power tools, security and communication systems, packaging technology, thermotechnology, household appliances, healthcare telemedicine and software solutions.
