

# Bosch GLL 150 ECK Laser Easy to Use, Offer 360-Degree Coverage

*No need to reposition the laser once it's centered in the work area*

## Bosch GLL 150 ECK Laser Easy to Use, Offer 360-Degree Coverage

**Mt. Prospect, Ill., March 16, 2015** – The Bosch GLL 150 ECK is an easy-to-use exterior laser that provides 360-degree coverage right out of the box. A compact design lends itself to simple setup on the jobsite. Add the fact that the GLL 150 ECK is easy to store and transport, thanks to its all-in-one carry case, and you've got the perfect every day exterior laser.

One-button operation delivers a 530-foot diameter range that's good for horizontal leveling in exterior applications. Whether you're leveling dirt on a new site, grading irrigation or maintaining level during a fresh pour of a concrete form, this laser can handle these demanding applications.

The GLL 150 ECK comes complete with the necessary accessories for all exterior leveling needs. A compact eight-foot tripod and grade rod make for easy one-person operation, and a laser receiver allows for maximum distance in bright conditions.

"This is an every-day exterior laser for mid-size jobsites and horizontal leveling applications," said Dan Rice, product manager, exterior leveling, BOSCH POWER TOOLS. "This is an affordable, easy-to-use laser that provides plenty of functionality. And transport from jobsite to jobsite is just as simple and safe thanks to the all-in-one carry case."

### A Solution that Saves Time, Saves Money

In addition, the Bosch GLL 150 ECK is a one-person leveling solution that saves time and money; it's designed so that one person can do a job that used to require two. The affordable self-leveling unit includes protection features found on more expensive line lasers. The line will begin to flash to alert the user to out-of-level condition and keeps the job level and on schedule. In addition, the pendulum automatically locks when the unit is turned off for protection during transport.
