“The Bosch Custom Case for Impact Tough bits is all about listening to the customer,” said Ana Michelini, product manager, accessories, BOSCH POWER TOOLS. “We heard how frustrating it could be for users to access bit sets on the jobsite; they were never able to get bits back into place, bits fell out of holders, cases broke and they never found a set that had just what they needed. We created a system that addresses these issues; the Bosch Custom Case is an easy way to help users stay organized on the job. Users have the option to buy pre-filled sets or customize their own to create a set that has everything they need.”

The Bosch Custom Case accommodates Bosch Impact Tough screw driver bits that deliver 10x the life versus standard impact bits. Impact Tough screw driver bits have an Xtended Torsion Zone to absorb torque peaks to reduce stress and breakage, and are engineered to accommodate today's high-torque impact drivers. Torque stress at the impact point of the tip is transferred to the tension dissipation zone to ensure longer life. Bosch Impact Tough™ screw driver bits are precision machined for better fit in the tool and better fit delivers more torque to the bit, reduces slippage and contributes to bit life. Better fit in the tool delivers less breakage and better performance.

The Bosch Custom Case can be used with Bosch Impact Tough black oxide drill bits as well. Bosch black oxide bits offer superior durability, speed and can be used for a variety of general purpose drilling applications. These bits offer quality drilling in everything from metal and wood to plastic and composite materials.
