Bosch GOP12V-28 12V Max EC Brushless Starlock® Oscillating Multi-Tool Offers Compact Design, Surprising Power

Bosch GOP12V-28 12V Max EC Brushless Starlock® Oscillating Multi-Tool Offers Compact Design, Surprising Power

Professional tool that makes tasks like cutting door jams easy and hassle free

Mt. Prospect, Ill., Oct. 10, 2017 – The Bosch GOP12V-28 12V Max Starlock® Oscillating Multi-Tool is a multi-use tool that boasts light weight and compact size combined with the surprising power of a Bosch 12-volt Max tool. The tool features the next-generation Starlock 3-D interface; the accessory connection is cupped and shaped like a bottle cap to provide more contact surface area for rock-solid blade grip and maximum torque transfer.

The oscillating tool's EC brushless motor delivers more power and enhanced efficiency versus the previous-generation tool's 12-volt motor. This tool produces a top speed of up to 20,000 oscillations per minute and has ample power for fine cuts and fast task completion. It has a 2.8° oscillating arc for better accessory utilization and increased productivity. The variable-speed dial allows users to match the oscillating speed to the material and task at hand with a range of 5,000 to 20,000 opm (oscillations per minute). Bosch-exclusive Constant Response circuitry allows the tool to maintain the desired speed even as load increases.

"For the cost-conscious pro looking for an oscillating multi-tool that has all of the performance attributes of a high-end tool, the Bosch GOP12V-28 Oscillating Multi-Tool fits the need," said Jim Stevens, product manager, BOSCH POWER TOOLS. "This is a professional-grade tool with all of the power and speed capabilities trade users have come to expect. All the key benefits of the Starlock interface are available in this tool."

The Bosch GOP12V-28 Oscillating Multi-Tool weighs in at 1.75 Lbs. and measures 11.2 In. long, making it compact enough to reach into tight spaces like corners. The tool also features a flexible accessory orientation with positions at every 30 degrees for customizable accessory positioning. The GOP12V-28 provides a soft-grip handle for better control and greater comfort, plus no-mar plastic ribs that protect the front of the tool from scuffs or scratches. A hex wrench is included for changing blades. Magnets help hold the blade in position and simplify blade changes. The GOP12V-28 accepts all of the Bosch Starlock® range of oscillating multi-tool accessories, except for StalockPlus® and StarlockMax® accessories.
