

Bosch WCBAT620 18V Wireless 4.0 Ah Battery Delivers More Runtime

Bosch WCBAT620 18V Wireless 4.0 Ah Battery Delivers More Runtime

Battery adds additional capability to the Bosch Power Ready Wireless Charging System

Mt. Prospect, Ill. (September 9, 2015) – With the release of the [WCBAT620 18V 4.0 Ah wireless battery](#), Bosch delivers even greater runtime from the company's Power Ready Wireless Charging System. The WCBAT620 18V battery offers 50 percent more runtime versus the current 2.0 Ah wireless battery. Both the 4.0 Ah and 2.0 Ah Bosch wireless batteries offer up to 100 percent longer life versus conventional batteries thanks to Bosch-exclusive CoolPack technology.

- **Click to Tweet:** .@BoschToolsNA debuts new #wireless charging battery <http://ctt.ec/O1Kj1>+ 50 percent more runtime than 2.0 Ah #battery. #Bosch #handyman

“For many professional tradesmen, battery runtime is a difference maker on the jobsite,” said Tim Truesdale, product manager, cordless, BOSCH POWER TOOLS. “Using the Bosch Power Ready Wireless Charging System means professional users can be confident that their cordless tools will always be ready to get the job done on time. Bosch’s goal when developing the 2.0 Ah wireless battery was to be more efficient and productive; now with the 4.0 Ah battery pack, we’ve doubled down and delivered.”

“There just isn’t time to deal with battery issues when projects are under time constraints and deadlines are tight. That’s why the WCBAT620 is here – because we know that battery runtime shouldn’t be an issue for any tradesman.”

This 4.0 Ah Wireless battery is based on the Bosch Power Ready Wireless Charging System. The wireless charging system gives professional users the ability to charge their tool when not in use without having to disconnect the battery from the tool. This saves both time and money because less charging time is required, and with the 4.0 Ah battery, no extra batteries are required to complete a day’s jobs.

The Bosch WCBAT620 4.0Ah Wireless Battery starts with the same heritage shared by all Bosch batteries: CoolPack technology, which delivers up to 100 percent more recharge life versus other battery packs thanks to heat-conductive housing that keeps the battery cool. The battery will perform in cold weather conditions down to -4°F.

Combined with heat reduction is single-cell monitoring, a technology that maximizes cell usage and life. Each Bosch wireless battery also includes an LED indicator that shows state of charge. In addition, all Bosch wireless batteries are part of a flexible power system that ensures 100 percent compatibility with all of the company’s 18V Lithium-ion power tools.

Charging times for a completely depleted Bosch WCBAT620 4.0 Ah Wireless Battery are 80 percent in 65 minutes, 100 percent in 85 minutes.

Target users for the Bosch WCBAT620 4.0 Ah Wireless Battery include mobile professionals in plumbing, construction, electrical and installation trades.
